

Fineblanking Services

Sko-Die's fineblanking capabilities, expertise and Feintool presses deliver precision components with cleanly sheared surfaces over the entire material thickness in a single operation. Tolerance range is traditionally within one one-thousandth of an inch. Fineblanking provides production cost savings by maximizing efficiencies and eliminating secondary operations.

Sko-Die's fineblanking operations include the following:

- (2) 160 ton Feintool Fineblanking presses
- (2) 250 ton Feintool Fineblanking presses
- Material Thickness range of 0.060" up to 0.375"
- Round parts up to 5.00" diameter and straight edged parts up to 8.00" in length
